Software Engineer with 3 years of experience building backend systems and microservices in Python. Expertise in Django, REST APIs, Docker, and distributed system design. Proven experience leading engineering teams and deploying production solutions for major Spanish banking clients processing high-volume document workflows.

Skills

Programming Languages: Python (Expert), SQL, Bash, JavaScript

Backend & Architecture: Django, FastAPI, Microservices, REST API Design, System Design

Tools & Infrastructure: Docker, Linux, Nginx, CI/CD, Git, PyTest, MySQL, Redis

Languages: English (fluent), Spanish (native), Catalan (native)

Work experience

Software Engineer | Serimag | Barcelona, Spain **July 2024 – Aug 2025**

- Mentored and led a team of 3 engineers on Django/REST API development, delivering 5+ production microservices for a major Spanish banking client.
- Resolved critical OAuth2.0 outages by implementing MySQL InnoDB Cluster and load balancing across dual environments; reduced recovery time from hours to <1 minute.
- Owned the end-to-end deployment lifecycle with weekly microservice releases on Linux using Docker, Nginx, CI/CD pipelines, automated testing with PyTest, and production monitoring.
- Maintained core Python orchestration platform coordinating business logic across 10 microservices, optimizing architecture from document-passing to DB reference IDs, reducing API latency for 100,000+ daily documents.

AI Developer Intern | Serimag | Barcelona, Spain **Jan 2023 – July 2024**

- Led end-to-end development of real-time TensorFlow classification model (CNNs) for ING; managed Linux deployment handling 30,000+ daily documents across 50+ categories, reducing manual labor by 80%.
- Engineered NLP/NER pipelines that increased invoice information extraction automation from 60% to 70% at 99% accuracy, saving 35 manual hours weekly across 5,000+ daily documents.

Full Stack Developer | Bandalux | Barcelona, Spain **June 2021 – Sept 2021**

- Implemented backend features using .NET and enhanced user interfaces through JavaScript, HTML and CSS for internal web applications, improving usability and performance.

Education

Polytechnic University of Catalonia – Barcelona, Spain **Sept 2024 – present**

Master's in Advanced Telecommunications Technologies (Specialization in Deep Learning for Multimedia Processing)

Polytechnic University of Catalonia – Barcelona, Spain **Sept 2018 – Jan 2024**

Bachelor's in Telecommunications Engineering

Projects

Analytics WebApp | Client: Rivex **Sept 2025 – Jan 2026**

- Architected a BI dashboard for Barcelona's White Rabbit Museum using FastAPI, Redis, and React with Prometheus & Grafana observability to visualize marketing ROI and customer trends.
- Implemented a fully automated CI/CD pipeline with GitHub Actions to deploy containerized microservices on a Linux VPS with zero downtime.

4Forms – Digitalization Platform | Client: Engi-On **Sept 2025 – Dec 2025**

- Led the digital transformation of service workflows by building a Django/React platform that eliminated 100% of manual paper processing, featuring integrated Prometheus health monitoring.
